

‘Voltcom Vision’ – is a Global product, a revolutionary new tool for companies that require instant, real-time insight into the compliance status and to evaluate all its employees against a role profile.

Vision is a managed system that enables companies with large teams of workers to track, communicate and manage their people, no matter where they are. It allows real time understanding of the training records of every individual, what they’re authorised to do, what qualifications need updating or renewing, what special skills and abilities they have and if there are any areas for development that need to be addressed. As such, it has a massive contribution to make to every user’s performance.

Voltcom Vision is extremely easy to use and can integrate simply with existing systems to provide all the immediate visibility and analysis that any company would require. We are a software development company focused on developing and delivering innovative solutions to meet our customer’s unique requirements. We deliver a sustainable system carrying ISO9000 and 9001 and capable of...
